Important note: when printing this page from your browser, be sure to set Page Scaling to None – that way the image will be correctly sized.

This is an exact printable copy of the insole or foot-bed for the indicated size. The size is located on the printable template. Have your child line their foot up with the dotted line on the rear (RIGHT SIDE) of the measuring template where the HEEL or BACK OF THE FOOT is located. Have the child stand up on the printed template on a smooth-flat surface; for a good fit make sure that they are wearing a sock that they would go ice skating in. Have your child put their weight down on that foot. It may be a little harder for smaller children, just have them lean down or lean forward towards the floor. Make sure to measure both of your child's feet and order the bigger size.

The SIZE indicated on the printable sizing template indicates the BABY SKATES size in a U.S. Sizing. To make it easier, all of our BABY SKATES ice skates are sized just like normal TODDLER'S or CHILDREN'S shoes. When sizing your child using this template we suggest that they fit SNUG to a (1/4 inch or 0.6 cm) bigger for growing room. With regular wear and usage, all BABY SKATES brand ice skates are designed to stretch and give. Please keep in mind they will stretch anywhere from a (1/4 to 1/2) of a size.

Please feel free to email us at information@babyskates.com or call us if you need further help or have a sizing question. For more great information please go to our **BABY SKATES SIZING PAGE** on our web site, www.babyskates.com for more MEASUREMENTS, CONVERSION CHARTS, and GENERAL SIZING INFORMATION.
